(Founder & CEO)

15+years of experience as solution architect Trainer /
blogger story Teller in SAP EWM / Yard logistics / TM

SAP Yard Logistics – Table of Contents

1. Introduction to SAP Yard Logistics

- 1.1 Overview of Yard Logistics
- 1.2 Importance of Yard Management in Supply Chain
- 1.3 Key Features and Benefits of SAP YL
- 1.4 SAP YL Architecture and System Landscape

2. Integration Overview

- 2.1 Integration with SAP EWM (Extended Warehouse Management)
- 2.2 Integration with SAP TM (Transportation Management)
- 2.3 Integration with SAP S/4HANA Core Modules
- 2.4 Communication and Data Exchange between Systems

3. Master Data Setup

- 3.1 Business Partners and Roles
- 3.2 Location and Yard Layout Configuration
- 3.3 Doors, Checkpoints, and Vehicle Resources
- 3.4 Equipment and Handling Units
- 3.5 Yard Vehicle and Transport Data

4. Yard Structure and Layout

- 4.1 Defining the Yard Layout
- 4.2 Defining Zones, Doors, and Checkpoints
- 4.3 Yard Resources and Capacity Planning
- 4.4 Configuring Yard Control Parameters

5. Yard Process Management

- 5.1 Yard Check-In and Check-Out Process
- 5.2 Dock Appointment Scheduling
- 5.3 Yard Task Creation and Execution
- 5.4 Yard Order Management
- 5.5 Monitoring Vehicle Movements and Task Status

6. Process Scenarios

- 6.1 Inbound Process Flow
- 6.2 Outbound Process Flow
- 6.3 Cross-Docking Process
- 6.4 Internal Yard Movements
- 6.5 Exception Handling and Alerts

7. Integration with Other SAP Modules

- 7.1 Integration with SAP EWM (Warehouse Tasks, Handling Units)

8. Configuration & Customization

- 8.1 Yard Management Configuration Steps
- 8.2 Yard Layout and Resource Setup in SPRO
- 8.3 Event Handling and Status Management
- 8.4 User Exits, BADIs, and Enhancements

9. Monitoring & Reporting

- 9.1 Yard Cockpit and Dashboards
- 9.2 Vehicle and Task Monitoring
- 9.3 KPIs and Analytical Reporting
- 9.4 Exception and Alert Monitoring

10. SAP Fiori and User Interface

- 10.1 Overview of SAP YL Fiori Applications
- 10.2 Yard Task and Yard Order Apps
- 10.3 Yard Cockpit and Real-Time Visibility
- 10.4 Custom Fiori Apps for Yard Operations

11. Implementation Approach

- 11.1 Project Phases and Methodology
- 11.2 Key Deliverables and Milestones
- 11.3 Data Migration Strategy
- 11.4 Testing and Validation (Unit, Integration, UAT)
- 11.5 Go-Live and Post Go-Live Support

12. Best Practices and Optimization

- 12.1 Yard Process Optimization Techniques
- 12.2 Common Challenges and Solutions
- 12.3 Performance Tuning in SAP YL
- 12.4 Future Trends and Innovations

13. Security and Authorizations

- 13.1 Role-Based Access Control
- 13.2 Authorization Objects for Yard Operations
- 13.3 Audit and Compliance Considerations

14. Future Enhancements

- 14.1 AI & IoT Integration in Yard Logistics
- 14.2 Real-Time Tracking and Geo-Fencing
- 14.3 Predictive Analytics for Yard Operations
- 14.4 SAP Digital Supply Chain Evolution

15. Conclusion

- 15.1 Summary of Key Learnings
- 15.2 Business Benefits of SAP YL Implementation
- 15.3 Future Roadmap and Upgrades
